Contents of Volume 7

NUMBER 1

Contributed Papers

P. E. An, M. Brown, C. J. Harris, A. J. Lawrence and **C. G. Moore** 1 Associative memory neural networks: adaptive modelling theory, software implementations and graphical user interface

Pau Serra, Miquel Sànchez, Javier Lafuente, Ulises Cortés and **Manel Poch** 23 DEPUR: a knowledge-based tool for wastewater treatment plants

A. D. H. Thomas and **M. G. Rodd** 31 Knowledge-based inspection of electric lamp caps

Marzuki Khalid, Sigeru Omatu and **Rubiyah Yusof** 39 Adaptive fuzzy control of a water bath process with neural networks

R. G. Miles, P. K. Sharpe, W. Pan and **T. C. Fogarty** 53 A comparative study of artificial neural networks and rule-based techniques in the development of a computer-aided control system

S. Parthasarathy 59 A framework for knowledge representation in safety-critical systems

Gideon Cohen 67 Intelligent vision system to control flexible assembly cell feeding processes

Arie Ben-David 77 A parallel monotonic classification machine

Brief Paper

S. Parthasarathy 83 Building temporal constraints into knowledge bases for process control—addendum

Book Reviews

L. Moseley 85 Innovative applications of artificial intelligence 4

Raimund Ubar 86 Boundary-scan test

L. Vôhandu 87 Artificial intelligence frontiers in statistics

Conference Calendar 89

NUMBER 2

Intelligent Autonomous Vehicles

Leo Motus v Editorial

C. J. Harris 101 Preface

Contributed Papers

David M. Lane and **Angus G. McFadzean** 105 Distributed problem solving and real-time mechanisms in robot architectures

N. J. W. Rayner, R. J. C. Fraser and **C. J. Harris** 119 Fuzzy and temporal representation for task-level mission management of IAVs using object orientation

C. M. Johnson and **J. O. Gray** 137 Hierarchical path-planning for a mobile robot

L. Cordewener and **D. Meizel** 151 On-line speed monitoring of mobile robots tasks

K. T. Rintanen 161 Curvature-optimal path planning and servoing for autonomous vehicles: a neural net implementation

W. P. J. Mackeown, P. Greenway, B. T. Thomas and **W. A. Wright** 169 Road recognition with a neural network

N. W. Campbell, M. R. Pout, M. D. J. Priestly, E. L. Dagless and **B. T. Thomas** 177 Autonomous road vehicle navigation

S. M. Smith and **J. M. Brady** 191 A Scene Segmenter; visual tracking of moving vehicles

J. M. Roberts and **D. Charnley** 205 Parallel attentive visual tracking

Conference Calendar 217

NUMBER 3

Contributed Papers

G. G. Brouwn, A. J. Krijgsman, H. B. Verbruggen and **P. M. Bruijn** 227 Single-layer networks for nonlinear system identification

Bernd-Markus Pfeiffer and **Rolf Isermann** 245 Criteria for successful applications of fuzzy control

A. Crespo, V. Botti, F. Barber, D. Gallardo and **E. Onaindía** 255 A temporal blackboard for real-time process control

Qing Xue and **Yung-Ping Chien** 267 Fast collision-free path planning of tightly coordinated two planar robots

Samuel Pierre 279 A learning-by-example method for improving performance of network topologies

Wei Zhang, Jiren Liu and **Huatian Li** 289 Verification of real-time programs by a knowledge-based strategy

D. Z. Badal and **U. J. Steck** 299 Comparison of local vs global approaches to 2D object recognition

Li-Min Jia and **Xi-Di Zhang** 311 Distributed intelligent railway traffic control: a fuzzy-decisionmaking-based approach

Simon Y. Foo, Yoshiyasu Takefuji and **Harold Szu** 321 Job-shop scheduling based on modified Tank–Hopfield linear programming networks

Brief Paper

Su-Nan Huang and **Hui-He Shao** 329 Application of pattern recognition to ethylene production optimization

Book Reviews

Rein Paluoia 335 Generating abstraction hierarchies

L. Motus 336 Synchronous programming of reactive systems

Conference Calendar 339

NUMBER 4

Contributed Papers
Ming Rao, Randy Dong and Valdimir Mahalec 349 Intelligent system for safe process startup

A. Stothert and **I. M. MacLeod** 361 Feature extraction for real-time expert systems

Sanja Vraneš, Mladen Stanojević and Pero Subašic 367 A framework for engineering intelligent control systems

Anwar K. Muhamad and Farzin Deravi 381 Neural networks for classification of image texture

X. D. Fang and **M. Tolouei-Rad** 395 Rule-based deep-drawing process planning for complex circular shells

E. D. Robe, E. C. Chung, C. A. Vassiliadis, Roger Klingensmith and John Amstrong 407 An object-oriented knowledge-based system for automating the routing process in a manufacturing environment

Xin Huang, F. Hassani and V. S. Lakshmanan 415 Knowledge-base management system for mine design and evaluation

M. R. A. Eltantawi and **P. Maresca** 427 Applications of Logic Programming in language analysis: document reconstruction from existing code

J. W. Lee, M. K. Kim and **K. Kim** 439 Optimal probe path generation and new guide point selection methods

K. W. Chau and **Wen-Wu Yang** 447 Structuring and evaluation of VP-Expert based knowledge bases

Brief Paper
J. L. Perez de la Cruz, M. J. Marti, R. Conejo, R. Morales-Bueno and T. Fernández 455 An expert system for identifying steels and cast irons

Book Review
Michal Kleiber and **Zenon Kulpa** 461 Cooperating expert systems in mechanical design

Conference Calendar 463

NUMBER 5

Control Applications of Fuzzy Logic

Clarence W. de Silva 471 Preface

Contributed Papers
D. H. Rao and **M. M. Gupta** 479 Neuro-fuzzy controller for control and robotics applications

N. Kiupel, P. M. Frank and J. Wochnik 493 Improvement of mold-level control using fuzzy logic

Zdenko Kovačić and Stjepan Bogdan 501 Model reference adaptive fuzzy control of high-order systems

Eddie Tunstel, Steve Hockemeier and **Mo Jamshidi** 513 Fuzzy control of a hovercraft platform

Wei Li 521 Fuzzy-logic-based reactive behavior control of an autonomous mobile system in unknown environments

Sujeet Shenoi, Kaveh Ashenayi and **Marc Timmerman** 533 Implementation of an on-line adaptive fuzzy controller in low-end hardware

J. Shi, L. H. Herron and **A. Kalam** 543 Optimization of fuzzy controllers as real-time power system stabilizers

Sae Kyu Nam and **Wan Suk Yoo** 559 Fuzzy PID control with accelerated reasoning for d.c. servo motors

C. W. de Silva and **J. Gu** 571 An intelligent system for dynamic sharing of workcell components in process automation

Conference Calendar 587

NUMBER 6

Contributed Papers

Miao Zhenjiang and **Yuan Baozong** 593 MIPAS: a neural network-based multimedia information processing and analysis system

J. M. A. Sassen and **A. Ollongren** 607 Developing real-time knowledge-based systems with PERFECT

Qiuming Zhu 627 Probabilistic reasoning in an augmented fact–proposition space and its applications

Goh Wee Leng, D. P. Mittal, Tay Sze Yong and **Tan Kok Kang** 639 A differential-processing extraction approach to text and image segmentation

N. F. Doherty and **A. K. Kochhar** 653 Knowledge engineering for model-based diagnosis: an experience-based development approach

Alexey Poletykin 665 RGEN: a method for computer-aided design of rule-based systems for plant process diagnosis

T. H. Lee, P. K. Yue and **K. K. Tan** 677 A neural-network-based model reference PID-like controller for process control

G. Q. Huang 685 An agent-based framework for cooperating expert systems in concurrent engineering

Conference Calendar 695
